

Universal Zebra System™

Troubleshoot, Diagnose, & Test ECM Systems

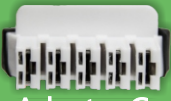

INCLUDES

Adapter A
16-pin plugs

Adapter B
4-pin plugs

Adapter C
X13 plugs

**Troubleshoot & Test
Individual Speeds**

More than Go/No Go

**No Batteries
Required**

24VAC Operating Voltage

**24" Connecting Wire
to Motor Adapters**

Test Most ECM Systems

Complete Sets

All Sets Include:

The Universal Zebra
Part #: UZ-1

36" Extension Harness
Part #: UZEXT

Carrying Case
Part #: UZACC

+ All Adapters

Part #UZPLUS
Includes All Available Adapters

+ All Power Test Harnesses

Part #UZALL
Includes Available Power Test Harnesses & Adapters

Universal Zebra System™

How it Works

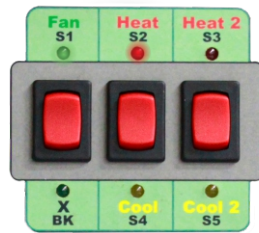

The Tool

Divide & Conquer

The Universal Zebra (UZ-1) logically splits electronic signals to the motor. Contractors can troubleshoot by isolating the motor from the system, testing individual signals to available speeds, observing the motor's responses, and quickly diagnosing if any part of the motor is the issue.

- 6 Indication LEDs
- 3 Three-Position Switches
- Built-In Circuit Breaker
- Alligator Connection Clips for 24VAC
- No Batteries Required
- 24" Motor Connection Wire
- 3 Most Common Adapters Included

Part #: UZ-1

Adapters

The Heart of The System

Adapters make the Universal Zebra System truly universal; allowing the UZ-1 to connect to most motor systems.

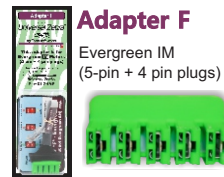

- Simple Plug-n-Play
- Magnetic Reference Card Indicating Possible Speeds Included

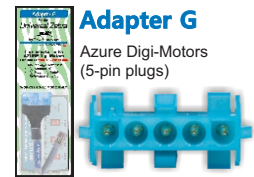

Part #: UZHMD

Part #: UZHME

Part #: UZHMF

Part #: UZHMG

Power Test Harnesses

Versatility in Diagnostics

Power test harnesses provide the ability to bench test motors from the most common ECM systems.

- Available for the Most Common Systems
- Simple Plug-n-Play
- Use In Unison with The Universal Zebra

Part #: UZPH1

Part #: UZPH2

Part #: UZPH3

Part #: UZPH4

Part #: UZPH5

Accessories

Available accessories to compliment your system

- 36" Extension Harness
- Carrying Case for all Components

Part #: UZEXT

Part #: UZACC
